UIUX case study

## **Title:**

Redesigning WhatsApp: Enhancing User Engagement  
with New Features

# Project Overview

WhatsApp is a popular messaging app used by millions of people around the world. It was created with a focus on simplicity and ease of use, but as technology and user demands have evolved, the app has fallen behind in terms of features. To stay competitive in the market, WhatsApp decided to redesign its app with several new features that would enhance user experience and provide more functionality. The redesign included the addition of a "Save Status" feature, an increased time limit for updates, and the ability to add short videos on user profiles.

## Introduction:

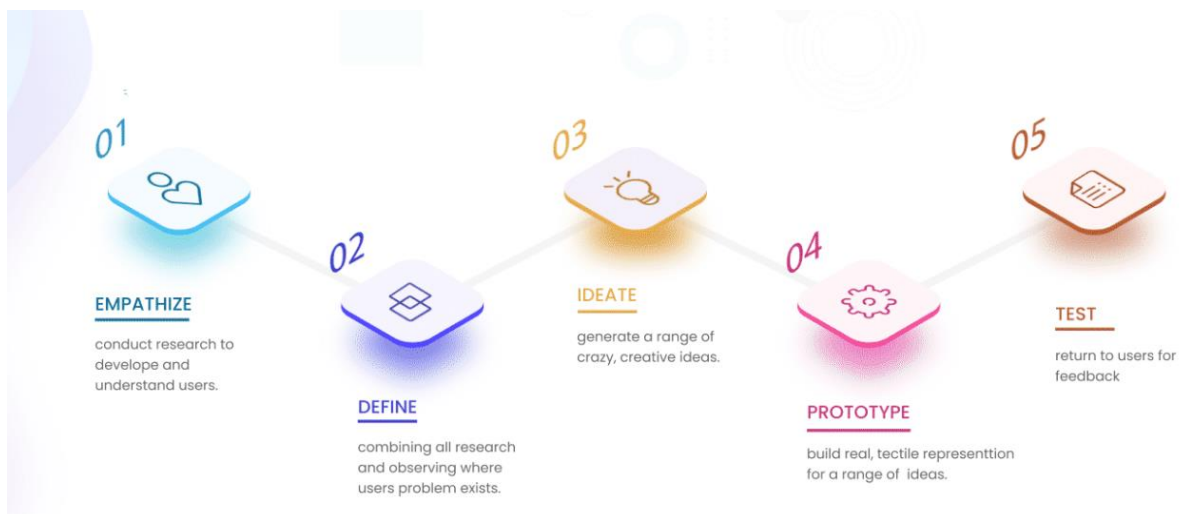

WhatsApp is a leading messaging app that connects billions of people worldwide. To keep pace with evolving user preferences and enhance the user experience, WhatsApp embarked on a redesign project. The goal was to introduce new features, including the ability to save status updates, increase the time limit for updates, and add short videos on WhatsApp DP.

## Goal

The main goals of the redesign were to:

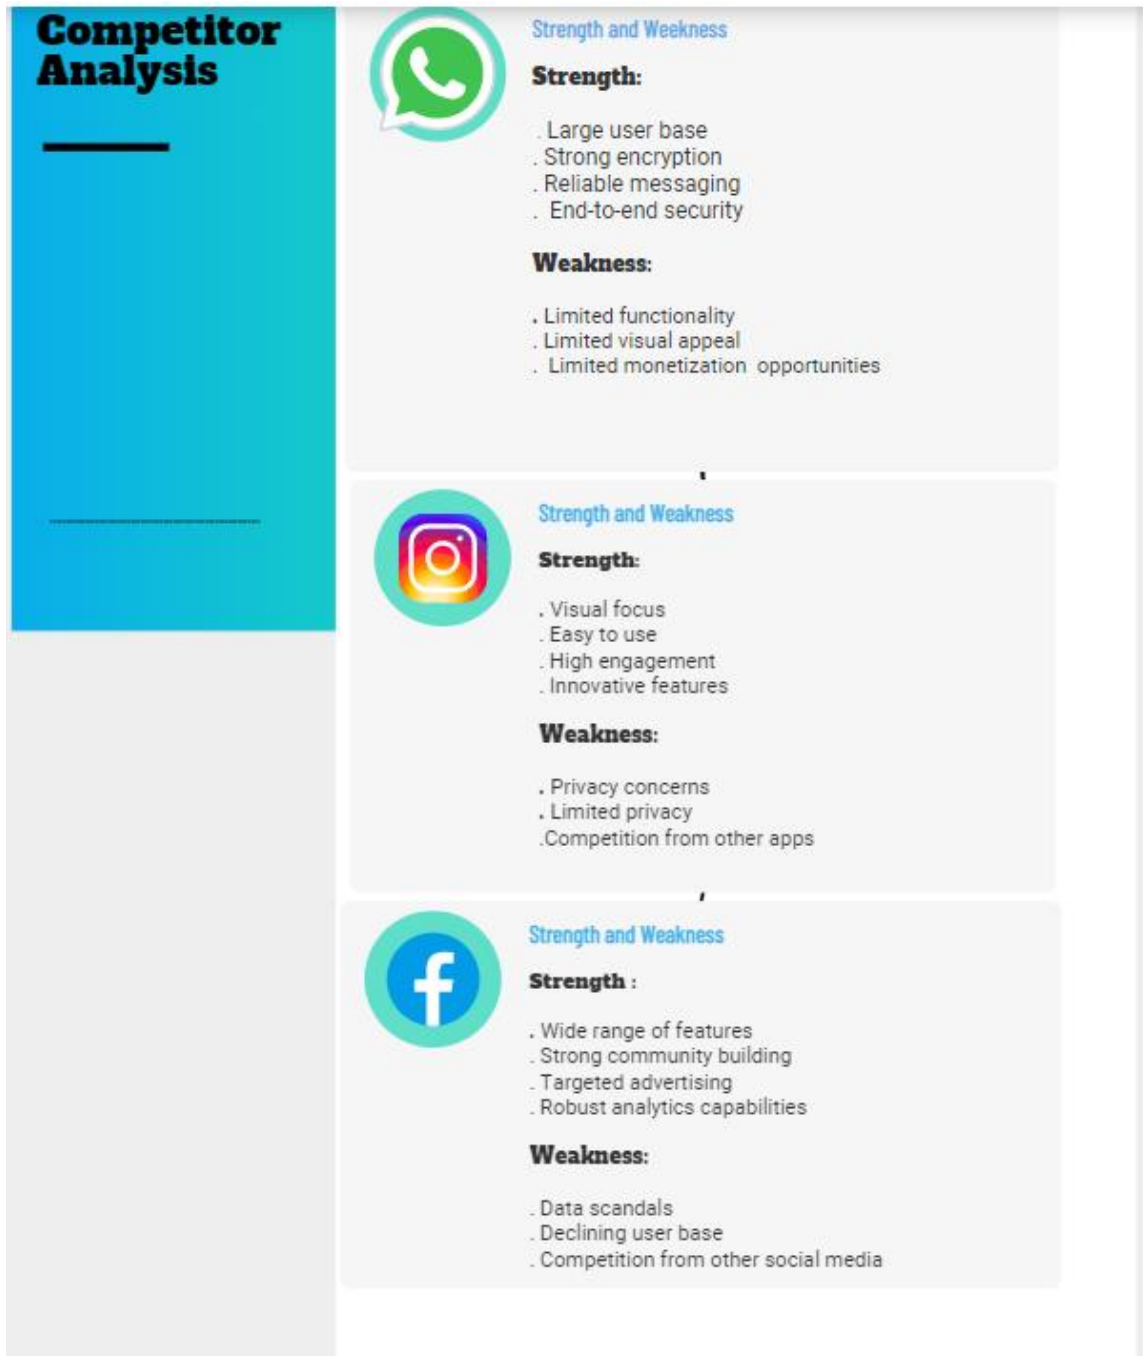

- Enhance user experience by adding new features that are useful and intuitive.
- Increase engagement on the app by providing users with more ways to interact with their contacts.
- Stay competitive in the market by keeping up with user demands and expectations.

## Design Process

# Competitor Analysis

Here is a mind map that includes the strengths and weaknesses of WhatsApp, Instagram, and Facebook as competitors in the messaging and social media market.

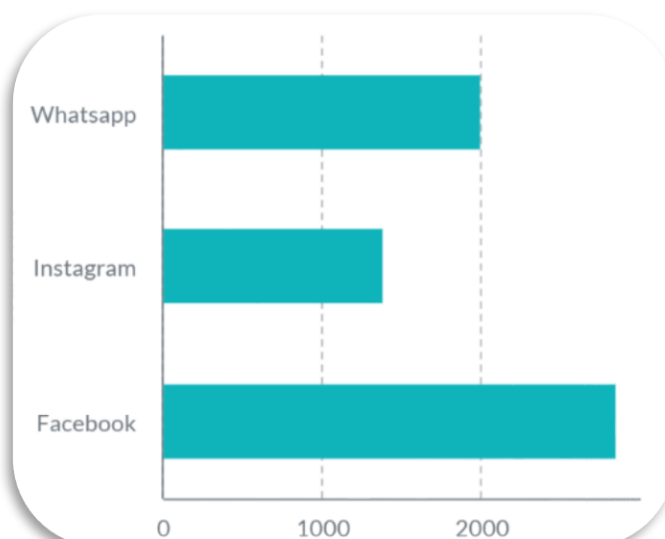

This mind map visualizes the messaging/social media market, with WhatsApp, Instagram, and Facebook as competitors. The strengths and weaknesses of each platform are listed, including WhatsApp's strong encryption and reliable messaging, Instagram's visual focus and high engagement, and Facebook's wide range of features and robust analytics capabilities. However, each platform also has its weaknesses, such as limited functionality for WhatsApp, privacy concerns for Instagram, and declining user base for Facebook.

Here's the complete breakdown of the percentage of US internet users who use WhatsApp by age group.

WhatsApp usage among US internet users

Active Users

# **Strengths and Weaknesses**

## **Strengths of WhatsApp:**

- Large user base: WhatsApp has over 2 billion monthly active users worldwide, making it one of the most popular messaging apps.
- End-to-end encryption: WhatsApp uses end-to-end encryptions for all messages and calls, making it a secure platform for communication.
- Cross-platform compatibility: WhatsApp can be used on both iOS and Android devices, as well as on desktop through its web and desktop apps.
- Easy to use: WhatsApp has a simple and user-friendly interface that makes it easy for users to send and receive messages, make calls, and share media.

## **Weaknesses of WhatsApp:**

- Limited customization: WhatsApp has limited options for customization, such as changing the background or font size.
- Limited file sharing: While WhatsApp allows users to share photos, videos, and documents, there is a size limit on file uploads, which can be a limitation for users.
- Limited group chat options: While WhatsApp offers group chats, it can be difficult to manage large groups and there are limited options for controlling the chat, such as muting specific users.

## **Changes in WhatsApp when adding new features:**

### **Save status:**

Adding the ability to save statuses would make it easier for users to save and share content with their contacts, increasing engagement and user satisfaction.

### **Increase time limit for WhatsApp update:**

Increasing the time limit for updates would give users more flexibility in updating the app and would reduce the number of users who miss updates due to time constraints.

### **Add short video on WhatsApp DP:**

Adding the ability to add short videos as profile pictures would increase customization options for users and improve the overall user experience.

# Research and Analysis:

## Suggested Improvements

***If you are satisfied with chatting, status, and contacts, then why? And if you are not satisfied, then what additions do you think should be made?***

34 responses

Yes

Satisfied

yes i am satisfied

No status save option

No

status saving

Ease to contact with friends and family

I am satisfied

It is easy to reach any friend or family through WhatsApp chatting

34 responses

Satisfy

Typing style must be changed

None

Satisfies with chatting ,status and sharing

yes satisfied

Uploading status limit should be of 1 min

Increase length of uploading status

Limit should be increase to upload status

Time limit is not enough

Using without internet

Privacy

Should be able to make calls without Internet

Not satisfied with the quality of status....quality drops down as compared to original quality of the picture or video

In Chat And Messages Delete for Every one Should Show Message that Is deleted

And After. 1 or 2 hours Of Delete For Everyone Message Should Be Deleted

The research highlighted the following key findings:

- Users desired the ability to save status updates from their contacts that they found interesting or inspiring.
- The existing time limit for updates was often perceived as restrictive, especially when users wanted to share longer videos or express themselves more effectively.
- Users expressed a strong interest in adding short videos on their WhatsApp DP to personalize their profiles and showcase their individuality.

# Empathy Map

By using this empathy map, designers can gain a better understanding of the needs and pain points of WhatsApp users, which can inform the design decisions made when adding new features.

The empathy map helps understand how the user behaves in different situations and contexts, which can inform the design of new features.

Background

David is the owner of a small landscaping business. He uses WhatsApp to communicate with his employees, clients, and family. He is married with three children and values spending time with his family. He is also an active member of his local community and participates in charity events. David is technology-savvy and enjoys using the latest gadgets and apps. He values security and privacy, especially when it comes to his business-related conversations.

Behaviour

Uses WhatsApp frequently throughout the day for work and personal communication

Sends and receives a large volume of messages, media, and documents

Participates in work-related group chats and shares confidential information

Prioritizes security and privacy in business-related conversations

Enjoys customizing and personalizing his technology devices and apps.

Goals

1. Communicate efficiently with employees and clients for business-related matters

2. Stay in touch with family and friends who live far away

3. Share photos, videos, and documents related to work and personal life

4. Manage his conversations and notifications more effectively

5. Have more control over his privacy settings.

Motivations

Being productive and organized in both personal and professional life

Staying connected with loved ones and colleagues

Keeping up with the latest technology trends and features

Pain Points:

Difficulty managing multiple conversations and groups

Distractions from notifications during work hours

Limited options for customization and personalization

Security concerns with business-related conversations.

📍

Miami, Florida

Marketing Manager

Bachelor's degree in Marketing

Marital Status: Single

Income: \$65,000/year

⋮ Background

- Maria is a young professional who loves to stay connected with her friends and family, especially since most of them live outside of Florida. She's always on the go and values efficiency and simplicity in her daily life. She's an avid traveler, foodie, and fitness enthusiast.

⋮ Status

“

Active social media user

Engaged in her community through volunteer work and local events

Career-focused and ambitious in her professional life

”

⋮ Skills

Strong communication skills

0255075100

Excellent organizational skills

0255075100

⋮ Needs and Goals

Stay connected with friends and family who live outside of Florida

Easily communicate with colleagues and business partners

Share photos, videos, and updates with friends and family

Manage and organize her conversations efficiently

Use a platform that is secure and respects her privacy

⋮ Interests and Hobbies

- Traveling
- Trying new restaurants and cuisines
- Yoga and running
- Reading and writing
- Learning new skills through online courses

⋮ Motivations

- Staying connected with her loved ones is very important to Maria
- She values efficiency and productivity in her daily life
- She's always looking for ways to simplify and streamline her communication and social media habits

⋮ Technology

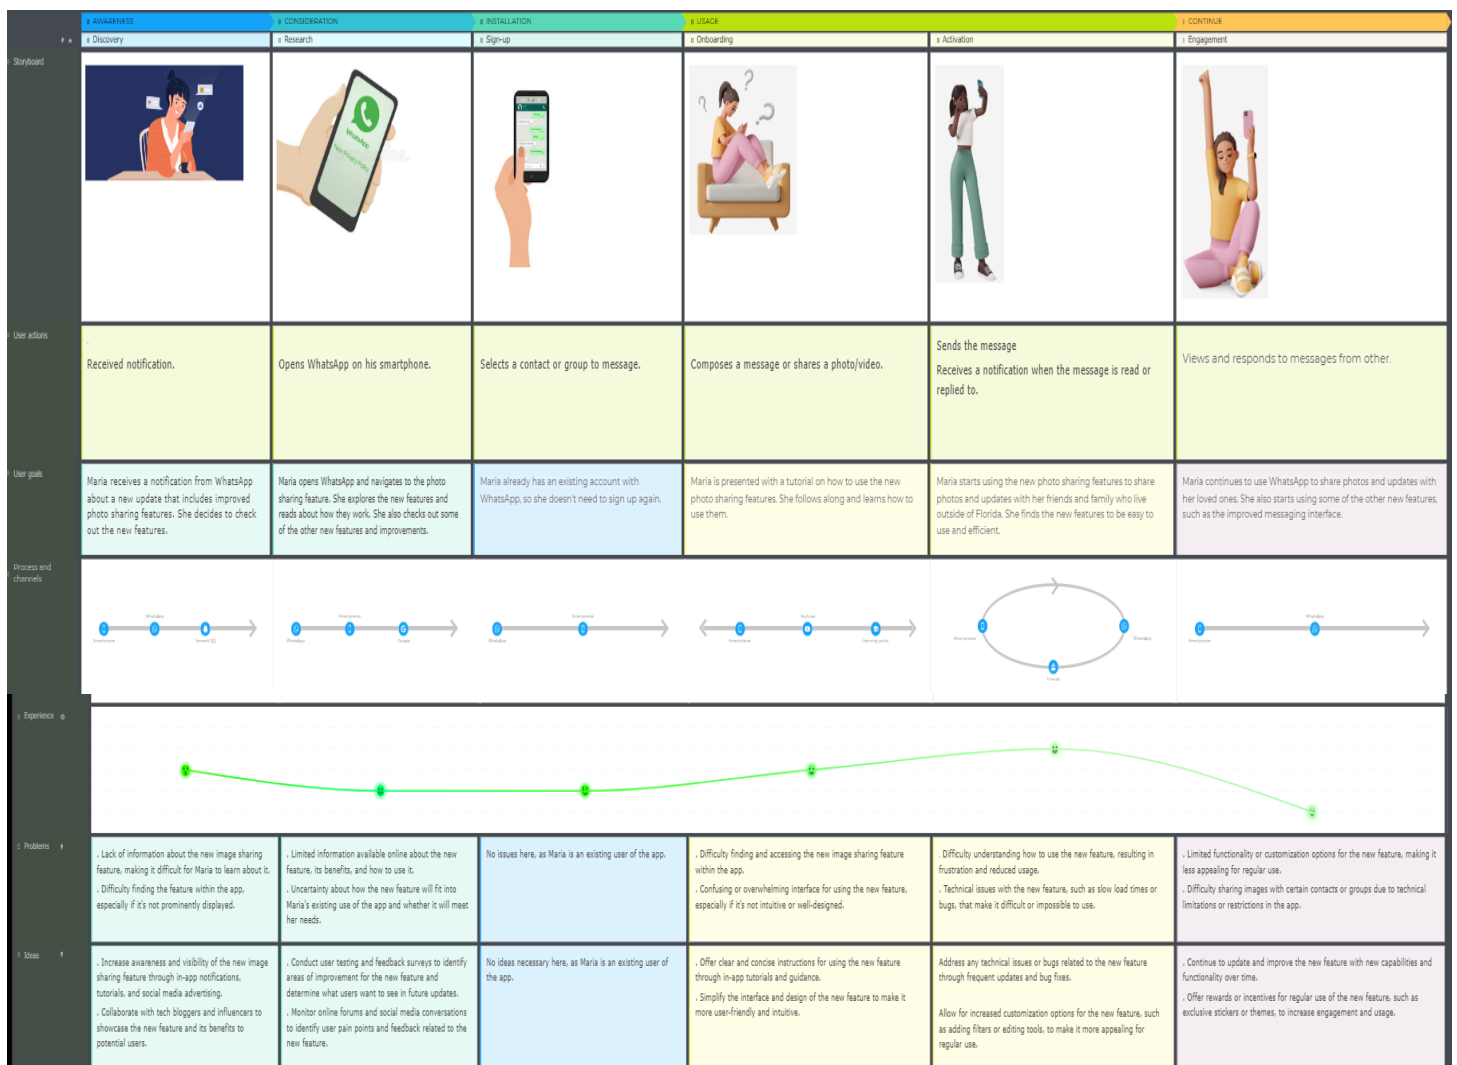

- Uses an iPhone X
- Relies heavily on social media apps for staying connected with friends and family
- Has a strong understanding of digital marketing and social media platforms
- Values simplicity and user-friendliness in her apps

⋮ Pain Points:

- Having to switch between multiple messaging apps to keep in touch with different groups of people
- Missing important messages because they get lost in a sea of notifications
- Feeling overwhelmed by the number of conversations and messages she receives on a daily basis
- Feeling concerned about the privacy and security of her personal information

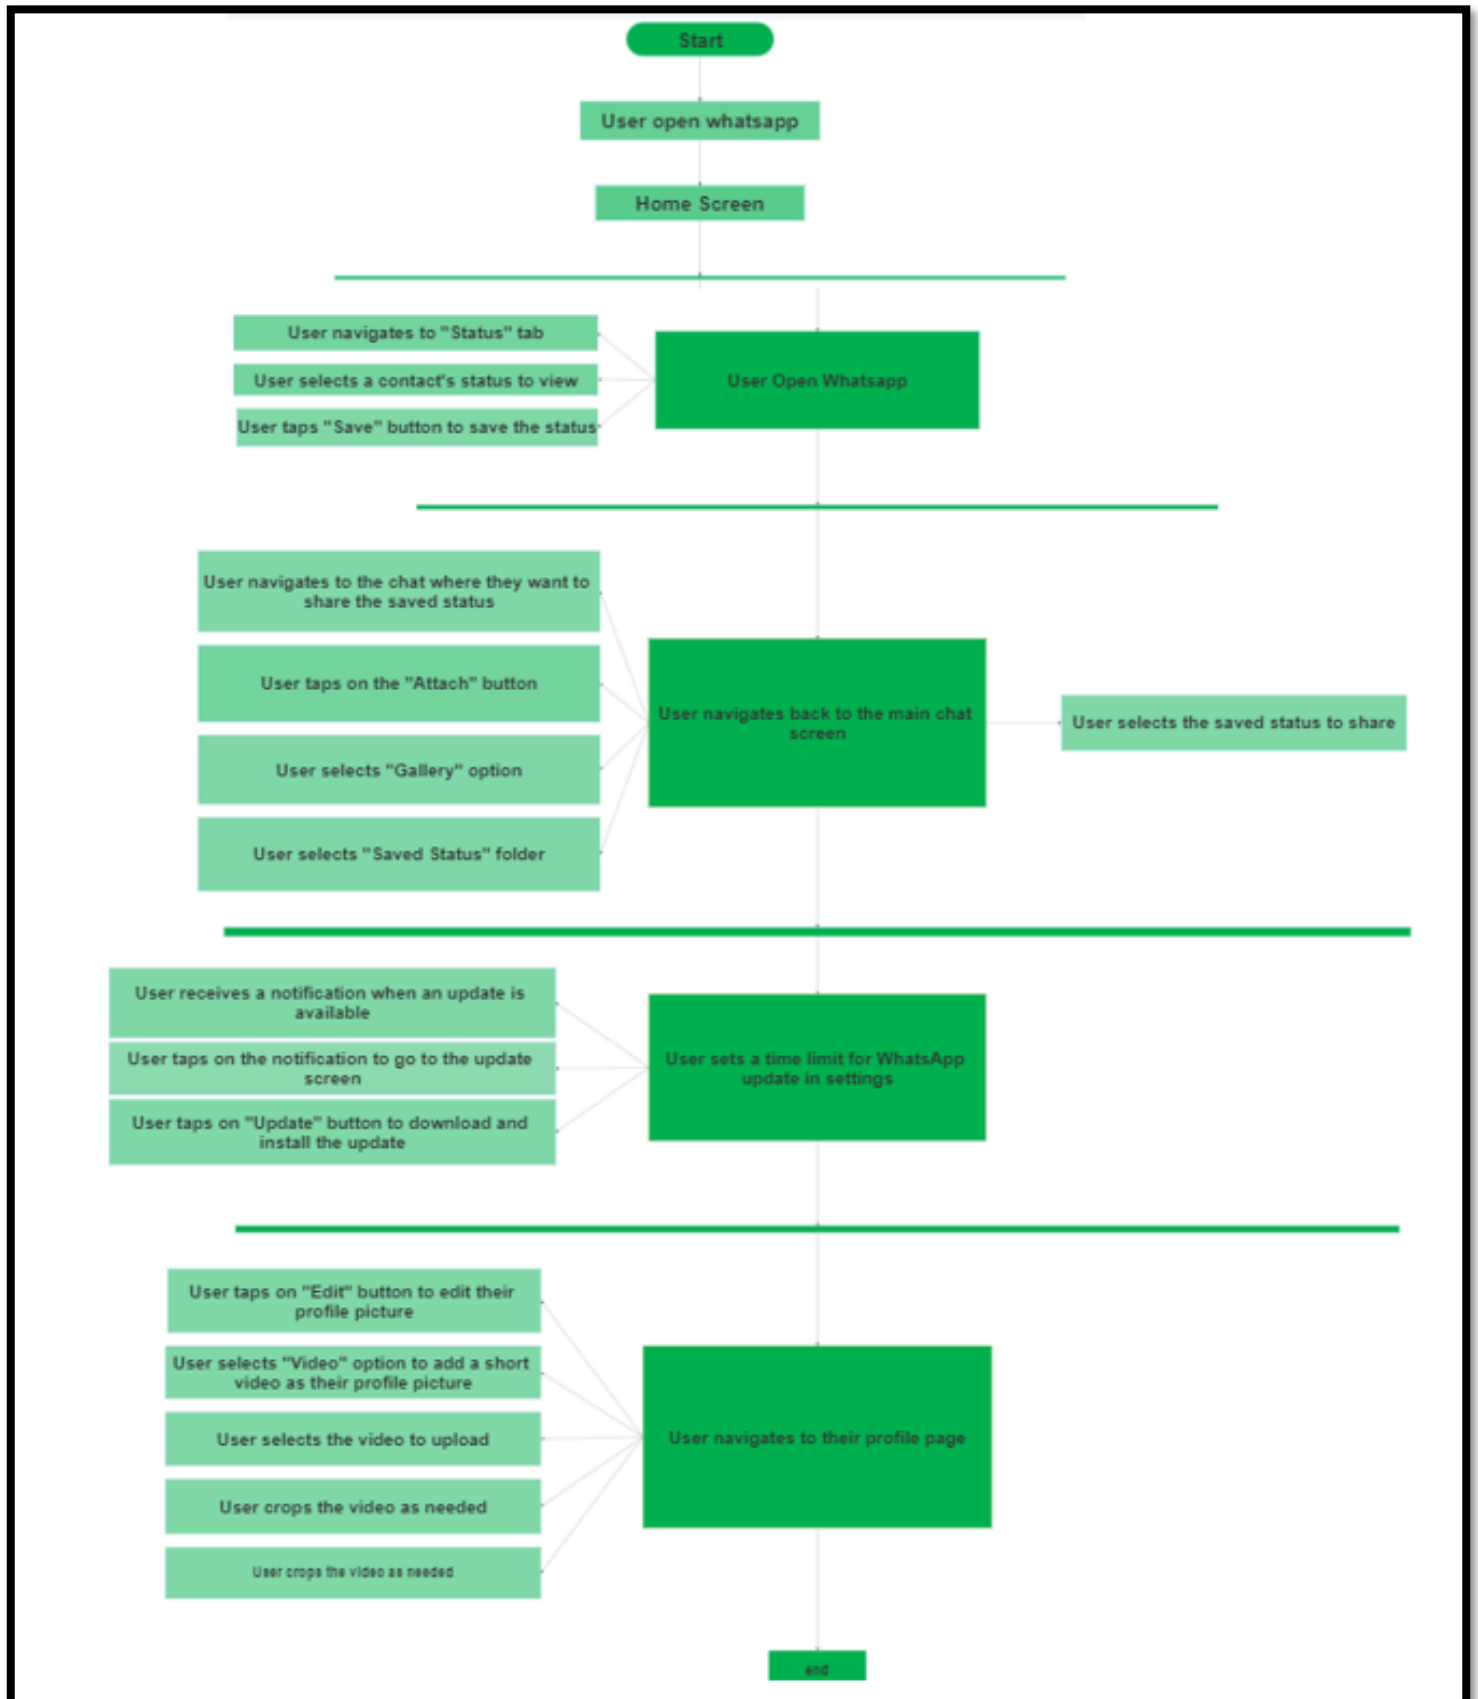

With this persona in mind, designers can create a WhatsApp redesign that addresses Alex's pain points, meets his goals, and aligns with his behaviours and motivations. The new design could include features such as improved message filtering, more control over notification settings, and enhanced customization options for the app's appearance and features. It could also include enhanced security measures for work-related conversations, such as encrypted messaging and passcode protection.
